Toronto_60435_2018_Day183to189.csv

The results below are what the student results should look like for the Toronto_60435_2018_Day183to189.csv dataset used in CHM 135 Experiment 1.

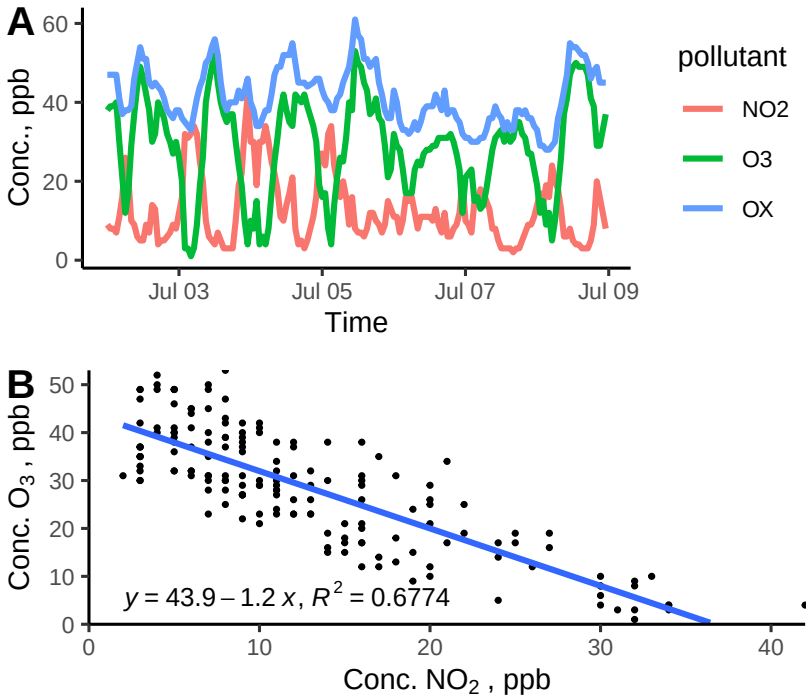

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	12.9	8.5	10	2	42
O3	28.5	12.4	30	1	53
OX	41.4	7.3	40	28	61
NO2_8hr	13.0	6.8	11	3	31
O3_8hr	28.3	10.2	29	7	49
OX_8hr	41.2	6.3	41	29	54

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* funcation rather than *STDEV.S* in Excel calculations. Do not substract points, but make a note of it.
