

Toronto_60433_2018_Day182to188.csv

The results below are what the student results should look like for the Toronto_60433_2018_Day182to188.csv dataset used in CHM 135 Experiment 1.

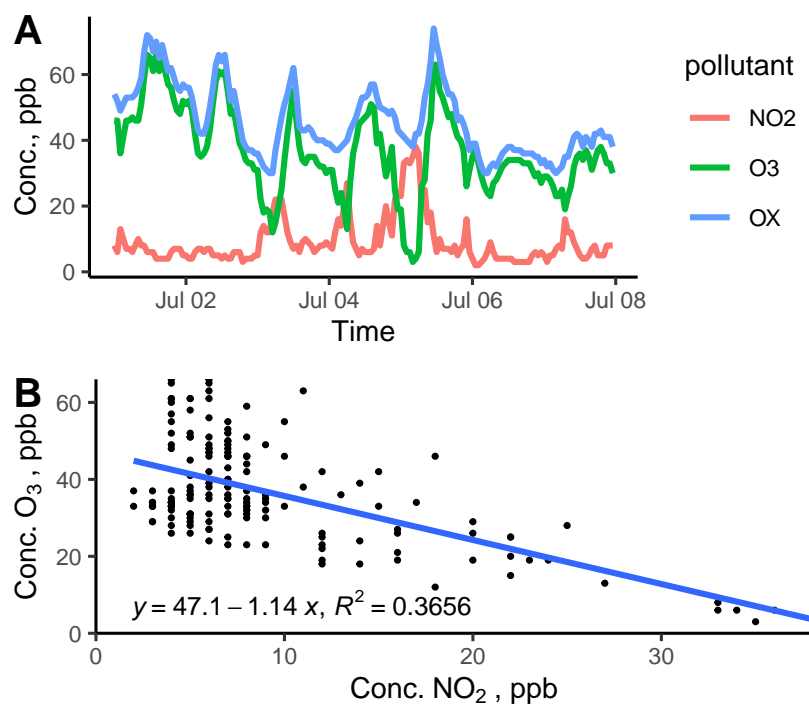

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	9.1	7.1	7	2	38
O3	36.7	13.5	35	3	66
OX	45.8	10.8	42	30	74
NO2_8hr	9.2	6.3	7	3	33
O3_8hr	36.6	12.0	34	7	64
OX_8hr	45.8	10.0	43	32	69

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
