

## Toronto\_60435\_2018\_Day2to8.csv

The results below are what the student results should look like for the Toronto\_60435\_2018\_Day2to8.csv dataset used in CHM 135 Experiment 1.

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	18.6	7.8	16	8	45
O3	20.8	6.9	22	1	31
OX	39.4	2.7	39	33	47
NO2_8hr	18.7	6.6	17	10	41
O3_8hr	20.7	6.0	21	4	31
OX_8hr	39.4	2.3	39	35	45

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

### Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
