

## Toronto\_60435\_2018\_Day185to191.csv

The results below are what the student results should look like for the Toronto\_60435\_2018\_Day185to191.csv dataset used in CHM 135 Experiment 1.

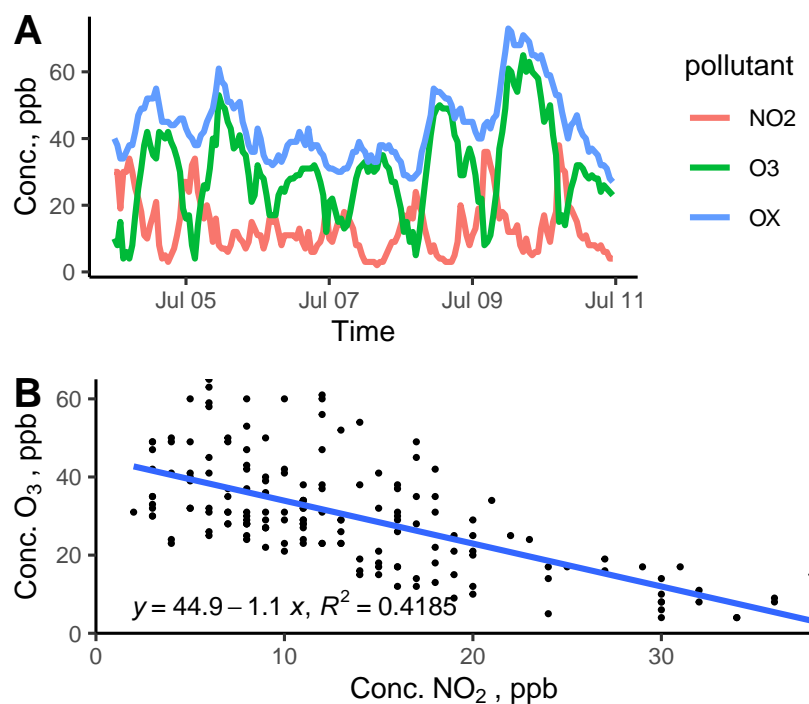

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	13.3	8.1	11	2	38
O3	30.3	13.8	29	4	65
OX	43.6	10.5	42	27	73
NO2_8hr	13.2	6.3	12	3	29
O3_8hr	30.8	11.8	29	8	61
OX_8hr	44.0	9.8	43	29	70

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

### Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
