

Toronto_60433_2018_Day192to198.csv

The results below are what the student results should look like for the Toronto_60433_2018_Day192to198.csv dataset used in CHM 135 Experiment 1.

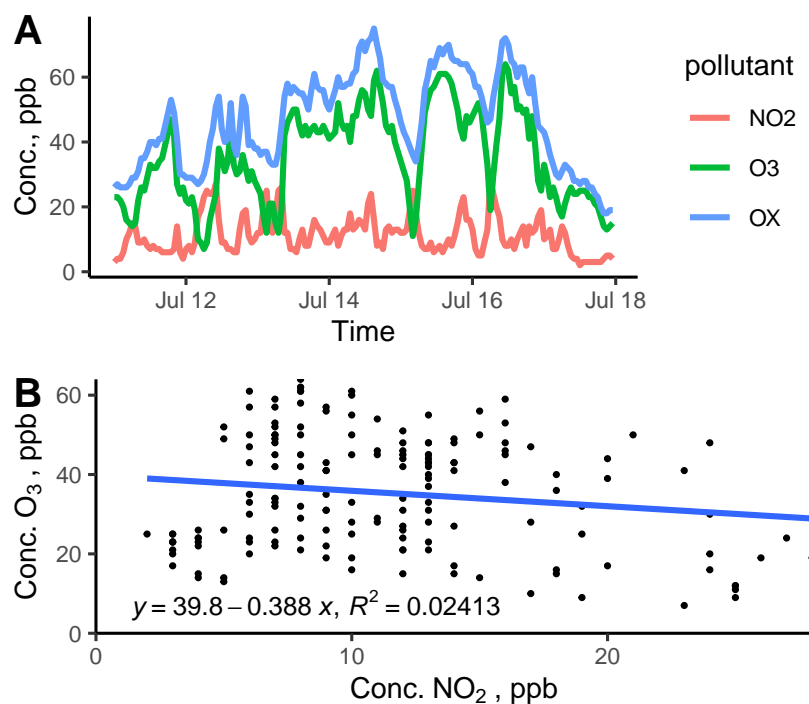

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	11.3	5.8	10	2	28
O3	35.4	14.5	34	7	64
OX	46.7	14.8	47	18	75
NO2_8hr	11.5	4.0	12	3	23
O3_8hr	36.1	12.7	36	13	60
OX_8hr	47.6	13.3	47	20	71

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
