

*Toronto\_60410\_2018/Toronto\_60410\_2018\_Day188to194.csv*

The results below are what the student results should look like for the Toronto\_60410\_2018/Toronto\_60410\_2018\_Day188to194.csv dataset used in CHM 135 Experiment 1.

Figure 1: Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.

Figure 2: Correlation plot of O<sub>3</sub> vs. NO<sub>2</sub>; the equation of the line is displayed in the lower left corner.

| pollutant | mean | sd   | median | min | max |
|-----------|------|------|--------|-----|-----|
| NO2       | 8.7  | 5.5  | 7      | 2   | 29  |
| O3        | 32.0 | 13.8 | 30     | 8   | 72  |
| OX        | 40.7 | 12.4 | 37     | 24  | 80  |
| NO2_8hr   | 8.7  | 4.3  | 8      | 3   | 23  |
| O3_8hr    | 32.0 | 12.4 | 29     | 13  | 67  |
| OX_8hr    | 40.7 | 11.6 | 38     | 25  | 75  |

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

#### Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values,

they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
