

*Toronto\_60410\_2018/Toronto\_60410\_2018\_Day15to21.csv*

The results below are what the student results should look like for the Toronto\_60410\_2018/Toronto\_60410\_2018\_Day15to21.csv dataset used in CHM 135 Experiment 1.

Figure 1: Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.

Figure 2: Correlation plot of O<sub>3</sub> vs. NO<sub>2</sub>; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	19.4	8.3	18	2	39
O3	18.3	9.2	19	1	37
OX	37.6	3.3	38	29	47
NO2_8hr	19.8	7.1	19	2	35
O3_8hr	17.9	8.2	18	1	36
OX_8hr	37.7	2.9	38	32	45

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

#### Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values,

they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
