

Toronto_60435_2018_Day189to195.csv

The results below are what the student results should look like for the Toronto_60435_2018_Day189to195.csv dataset used in CHM 135 Experiment 1.

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	14.4	8.7	12	3	42
O3	30.9	15.6	30	1	65
OX	45.3	12.1	45	26	73
NO2_8hr	14.3	6.8	13	4	30
O3_8hr	31.2	13.8	30	6	61
OX_8hr	45.5	11.4	44	27	70

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* function rather than *STDEV.S* in Excel calculations. Do not subtract points, but make a note of it.
