$Toronto_60410_2018/Toronto_60410_2018_Day190to196.csv$

The results below are what the student results should look like for the $Toronto_60410_2018/Toronto_60410_2018_Day190to196.csv$ dataset used in CHM 135 Experiment 1.

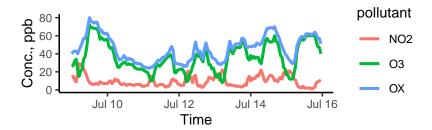

Figure 1: Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.

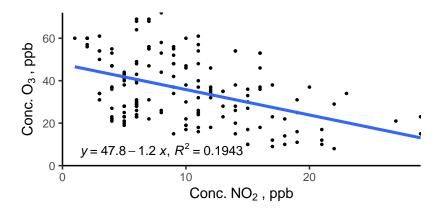

Figure 2: Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	9.7	5.8	8	1	29
O3	36.2	15.7	34	8	72
OX	45.9	14.1	46	24	80
$\rm NO2_8hr$	9.6	4.6	9	2	23
$O3_8hr$	36.1	14.1	34	13	68
$\mathrm{OX}_{-}8\mathrm{hr}$	45.7	13.3	43	25	75

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values,

they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
