Toronto_60433_2018_Day8to14.csv

The results below are what the student results should look like for the Toronto_60433_2018_Day8to14.csv dataset used in CHM 135 Experiment 1.

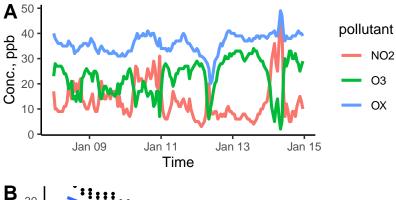

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.
(B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

Conc. O ₃ , ppb B	y = 33.4 - 0.802	$x, R^2 = 0.7276$	3		4
0 1 0	10	20	30	40	
		Conc. NO	₂ , ppb		

pollutant	mean	sd	median	min	max
NO2	13.2	7.4	11	3	47
O3	22.8	7.0	24	2	34
OX	36.0	3.9	36	20	49
$\rm NO2_8hr$	13.3	6.1	12	5	35
$\mathrm{O3}_8\mathrm{hr}$	22.6	5.9	23	8	33
OX_8hr	35.9	3.5	36	25	43

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values, they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
