Toronto 60433 2018 Day5to11.csv

The results below are what the student results should look like for the Toronto_60433_2018_Day5to11.csv dataset used in CHM 135 Experiment 1.

20

Conc. NO₂ , ppb

30

10

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.
(B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	14.7	7.1	13	5	42
O3	21.7	5.9	23	2	33
OX	36.4	3.0	36	31	45
$ m NO2_8hr$	14.9	5.7	13	6	36
$\mathrm{O3}_8\mathrm{hr}$	21.5	4.8	22	7	31
$\mathrm{OX}_{-}8\mathrm{hr}$	36.4	2.7	36	31	44

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

0

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values, they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
