Toronto_60435_2018_Day180to186.csv

The results below are what the student results should look like for the $Toronto_60435_2018_Day180to186.csv$ dataset used in CHM 135 Experiment 1.

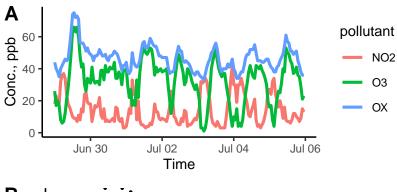

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.
(B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

Courc. O3, ppb B	y = 50.8 - 1.29 x, F	$R^2 = 0.7269$		•
0	10	20	30	40
		Conc. NO ₂ , p	pb	

pollutant	mean	sd	median	min	max
NO2	14.4	9.2	12	3	42
O3	32.2	14.0	35	1	66
OX	46.6	7.8	46	33	75
$\rm NO2_8hr$	14.3	7.1	12	4	31
$O3_8hr$	32.5	11.5	34	7	60
$\mathrm{OX}_{-}8\mathrm{hr}$	46.9	6.5	47	36	69

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values, they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
