$Toronto_60410_2018/Toronto_60410_2018_Day184to190.csv$

The results below are what the student results should look like for the $Toronto_60410_2018/Toronto_60410_2018_Day184to190.csv$ dataset used in CHM 135 Experiment 1.

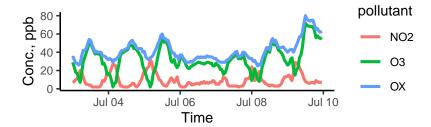

Figure 1: Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.

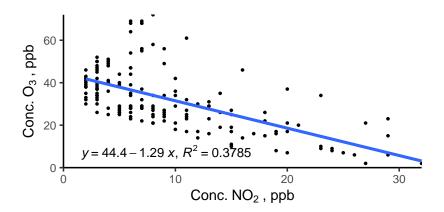

Figure 2: Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	min	max
NO2	9.2	6.9	7	2	32
O3	32.4	14.5	30	2	72
OX	41.7	11.6	40	25	80
$\rm NO2_8hr$	9.3	5.8	7	2	24
$O3_8hr$	32.2	12.4	29	10	68
$\mathrm{OX}_{-}8\mathrm{hr}$	41.5	10.5	38	29	75

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values,

they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
