$Toronto_60410_2018/Toronto_60410_2018_Day189to195.csv$

The results below are what the student results should look like for the $Toronto_60410_2018/Toronto_60410_2018_Day189to195.csv$ dataset used in CHM 135 Experiment 1.

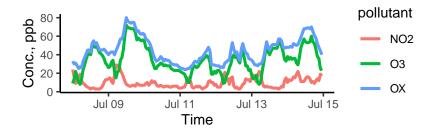

Figure 1: Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.

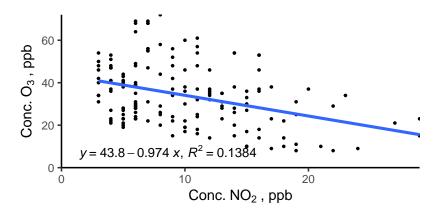

Figure 2: Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	sd	median	\min	max
NO2	9.8	5.6	8	3	29
O3	34.2	14.7	32	8	72
OX	44.0	13.6	44	24	80
$\rm NO2_8hr$	9.6	4.3	9	3	23
$O3_8hr$	34.7	13.0	33	13	68
$\mathrm{OX}_{-}8\mathrm{hr}$	44.3	12.8	43	25	75

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values,

they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
