## Toronto 60433 2018 Day193to199.csv

The results below are what the student results should look like for the Toronto\_60433\_2018\_Day193to199.csv dataset used in CHM 135 Experiment 1.

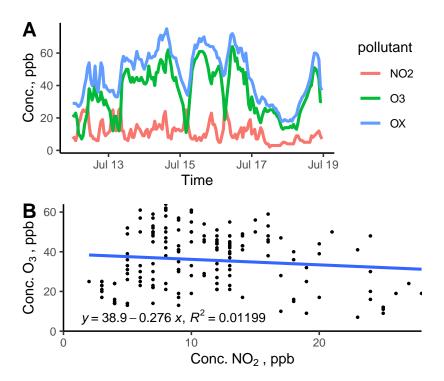

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	$\operatorname{sd}$	$_{ m median}$	min	max
NO2	11.2	5.8	10	2	28
O3	35.8	14.7	38	7	64
OX	47.0	15.2	50	18	75
$ m NO2\_8hr$	11.2	4.3	12	3	23
$O3\_8hr$	36.1	13.2	38	13	60
$\mathrm{OX}_{-}8\mathrm{hr}$	47.3	14.4	50	18	71

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

## Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values, they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
