## $Toronto\_60435\_2018\_Day15to21.csv$

The results below are what the student results should look like for the Toronto\_60435\_2018\_Day15to21.csv dataset used in CHM 135 Experiment 1.

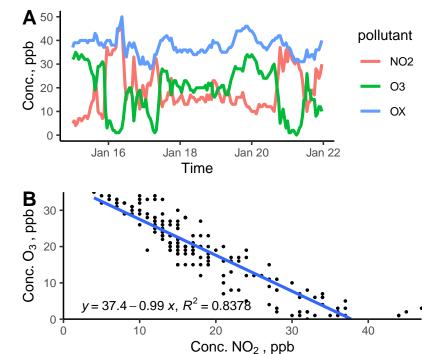

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pollutant	mean	$\operatorname{sd}$	median	min	max
NO2	19.0	9.1	16	4	47
O3	18.6	9.8	20	0	35
OX	37.6	4.0	38	28	50
$ m NO2\_8hr$	19.1	7.7	16	6	41
$\mathrm{O3}\_8\mathrm{hr}$	18.5	8.8	20	1	33
$OX_8hr$	37.6	3.5	38	<b>3</b> 0	45

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

## Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values, they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
