## Toronto 60435 2018 Day9to15.csv

The results below are what the student results should look like for the Toronto\_60435\_2018\_Day9to15.csv dataset used in CHM 135 Experiment 1.

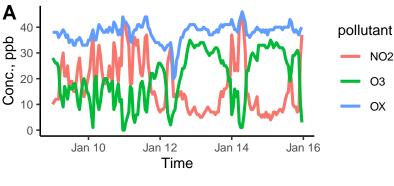

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.
(B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

Conc. O <sub>3</sub> , ppb <b>B</b>	y = 36.1 – 0.897	$x, R^2 = 0.8753$		
0	0 10	20	30	40
Conc. NO <sub>2</sub> , ppb				

pollutant  $\operatorname{sd}$ median min mean max NO217.6 10.3 4 15 45 $O_3$ 20.3 9.8 20 0 35 OX37.9 3.6 39 20 46  $NO2\_8hr$ 17.68.518 5 35O3 8hr 20.218 7 33 8.7 OX 8hr 37.8 39 28 3.1 42

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

## Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values, they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
