Toronto_60435_2018_Day1to7.csv

The results below are what the student results should look like for the Toronto_60435_2018_Day1to7.csv dataset used in CHM 135 Experiment 1.

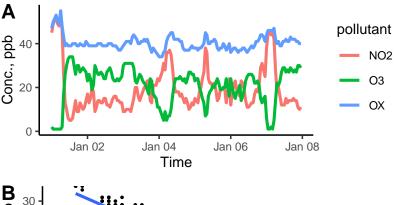

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it.
(B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

pp	30 - 20 - 10 -	y = 35.9 - 0.77	$75 x, R^2 = 0$.9192		.
	0	10	20 Conc.	30 . NO ₂ , ppb	40	50

pollutant	mean	sd	median	min	max
NO2	19.4	10.2	16	5	54
O3	20.9	8.2	23	1	34
OX	40.3	3.3	40	34	55
$\rm NO2_8hr$	19.0	8.0	17	8	49
$O3_8hr$	21.1	6.7	23	1	32
$\mathrm{OX}_{-}8\mathrm{hr}$	40.1	2.5	40	35	50

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

Notes on results:

Students are **not** expected to calculate mean, sd, and median of 8 hr averages. If student sd values differ slightly from provided sd values, they may have used the STDEV.P funcation rather than STDEV.S in Excel calculations. Do not substract points, but make a note of it.
