Toronto_60433_2018_Day4to10.csv

The results below are what the student results should look like for the Toronto_60433_2018_Day4to10.csv dataset used in CHM 135 Experiment 1.

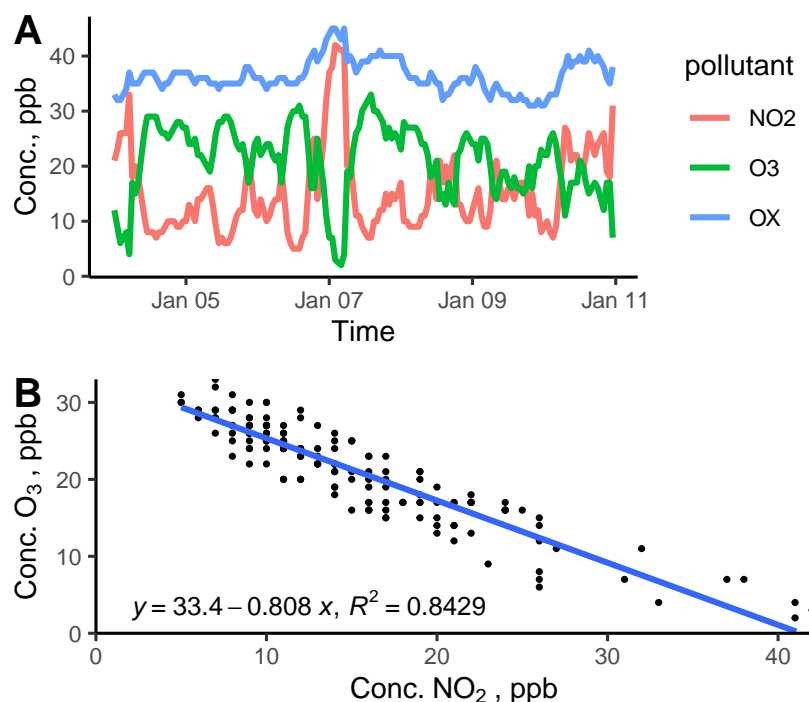

Figure 1: (A) Time series of pollutant concentration. There shouldn't be a linear regression on this plot, if students have done so please note it. (B) Correlation plot of O3 vs. NO2; the equation of the line is displayed in the lower left corner.

Table 1: Summary statistics for 1 hr and 8hr concentration of pollutants, all concentrations are in ppb.

pollutant	mean	sd	median	min	max
NO2	15.1	7.3	14	5	42
O3	21.2	6.5	22	2	33
OX	36.3	2.9	36	31	45
NO2_8hr	14.8	5.9	13	6	36
O3_8hr	21.6	5.1	22	7	31
OX_8hr	36.4	2.7	36	31	44

Notes on results:

Students are **not** expected to calculate *mean*, *sd*, and *median* of 8 hr averages. If student *sd* values differ slightly from provided *sd* values, they may have used the *STDEV.P* funcation rather than *STDEV.S* in Excel calculations. Do not substract points, but make a note of it.
